Languages | French – native • English – fluent

Curious and driven **Computer Science and Aerospace Engineer** currently completing my final internship as part of a dual Master's degree at Concordia University (Canada) and IPSA (France). Passionate in **machine learning, deep learning and satellite imagery processing**, I am now seeking a full-time opportunity to apply these skills.

SKILLS

Programming | Python • MATLAB • C++ • SQL • R

ML / AI | Machine learning • Deep Learning • PyTorch • OpenCV • SAR Imagery • Git • Data Engineering

Soft Skills | Communication • Autonomous • Proactive • Innovative • Thinking out of the box • Problem-solving • Project Management • Team building • Kaizen

Software | Word • Excel • PowerPoint • Teams • Amesim • STAR-CCM+ • ANSYS • CATIA V5 • SolidWorks • STK • Patran/Nastran

WORK EXPERIENCE

Research Engineering Intern in Deep Learning for SAR Imagery Processing

Jan 2026 – Present

National University of Singapore, Singapore

- Developed a reproducible **deep-learning** pipeline in **Python** and **PyTorch** for data preparation, model training, evaluation, and experiment management.
- Designed and compared **real-valued and complex-valued neural network** approaches for learning from ionosphere-affected **radar signal** representations.
- Scaled the workflow to **HPC** environments to support larger experiments, with the long-term goal of improving the modelling, characterization, and mitigation of ionospheric effects in low-frequency **SAR systems**.

Dynamic Satellite Database Development Intern

Jun 2024 – Aug 2024

ONERA, Palaiseau, France

- Used **Python** and **MongoDB** to build and optimize the **database**, implementing data pipelines for **satellite** tracking and analysis.
- Verified **data integrity** by developing scripts to detect and remove duplicates.
- Streamlining satellite cataloguing processes and improving consistency across datasets.

EDUCATION

Master of Engineering – Aerospace and Computer Science Engineering

Concordia University, Montreal, QC

2024 - 2026

Master of Engineering – Aerospace and Computer Science Engineering

Institut Polytechnique des Sciences Avancées, Paris, France

2022 - 2026

Exchange Semester

Universiti Sains Malaysia, Penang, Malaysia

Oct 2023 – Mar 2024

VOLUNTEER WORK

Ropes Course Instructor Jul 2018

Karaez Adrenaline, Carhaix, France

INTERESTS

Reading

Fantasy, Philosophy, Manga, Comics, History

Sports

Bouldering (3 years), Tennis (5 years), Chess (1300 elo Glicko)

Passions

Hiking, Guitar, Piano
