Languages | French – native • English – fluent

Curious and driven **Computer Science and Aerospace Engineer** currently completing my final internship as part of a dual Master's degree at Concordia University (Canada) and IPSA (France). Passionate in **machine learning, deep learning and satellite imagery processing**, I am now seeking a full-time opportunity to apply these skills.

SKILLS

Programming | Python • MATLAB • C++ • SQL • R

ML / AI | Machine learning • Deep Learning • PyTorch • OpenCV • SAR Imagery • Git • Data Engineering

Soft Skills | Communication • Autonomous • Proactive • Thinking out of the box • Problem-solving • Team building

Software | Word • Excel • PowerPoint • Teams • STAR-CCM+ • ANSYS • CATIA V5 • STK • Patran/Nastran

WORK EXPERIENCE

Research Engineering Intern in Deep Learning for SAR Imagery Processing

Jan 2026 – Present

National University of Singapore, Singapore

- Developed a **Python/PyTorch** deep-learning pipeline for data preparation, training, evaluation and experiment management, scaled to **HPC** environments.
- Designed and compared **real-valued and complex-valued neural network** architectures on ionosphere-affected **radar signal** representations.
- Improving modelling and mitigation of **ionospheric effects** in low-frequency **SAR systems**.

Dynamic Satellite Database Development Intern

Jun 2024 – Aug 2024

ONERA, Palaiseau, France

- Used **Python** and **MongoDB** to build and optimize the **database**, implementing data pipelines for satellite tracking and analysis.
- Verified **data integrity** by developing scripts to detect and remove duplicates.
- Streamlining **satellite** cataloguing processes and improving consistency across datasets.

EDUCATION

Master of Engineering – Aerospace Engineering

2024 - 2026

Concordia University, Montreal, QC

- Specialized in Aerospace with a focus on computational methods for aerospace applications.

Master of Engineering – Aerospace Engineering

2022 - 2026

Institut Polytechnique des Sciences Avancées, Paris, France

- Specialized in Space, Launchers & Satellites.

Exchange Semester

Oct 2023 – Mar 2024

Universiti Sains Malaysia, Penang, Malaysia

INTERESTS

Bouldering (3 years), Tennis (5 years), Chess (1300 elo Glicko)

VOLUNTEER WORK

Ropes Course Instructor
